

FUTURE OF TEACHING

World 10 – 15 years from now

Part of conventional industries moved after cheaper labour

Digital economy has become more dominant

Competitiveness is based on shared knowing, networking and innovation

Role of regions and urban areas become more important

Wellness markets expanded dramatically worldwide

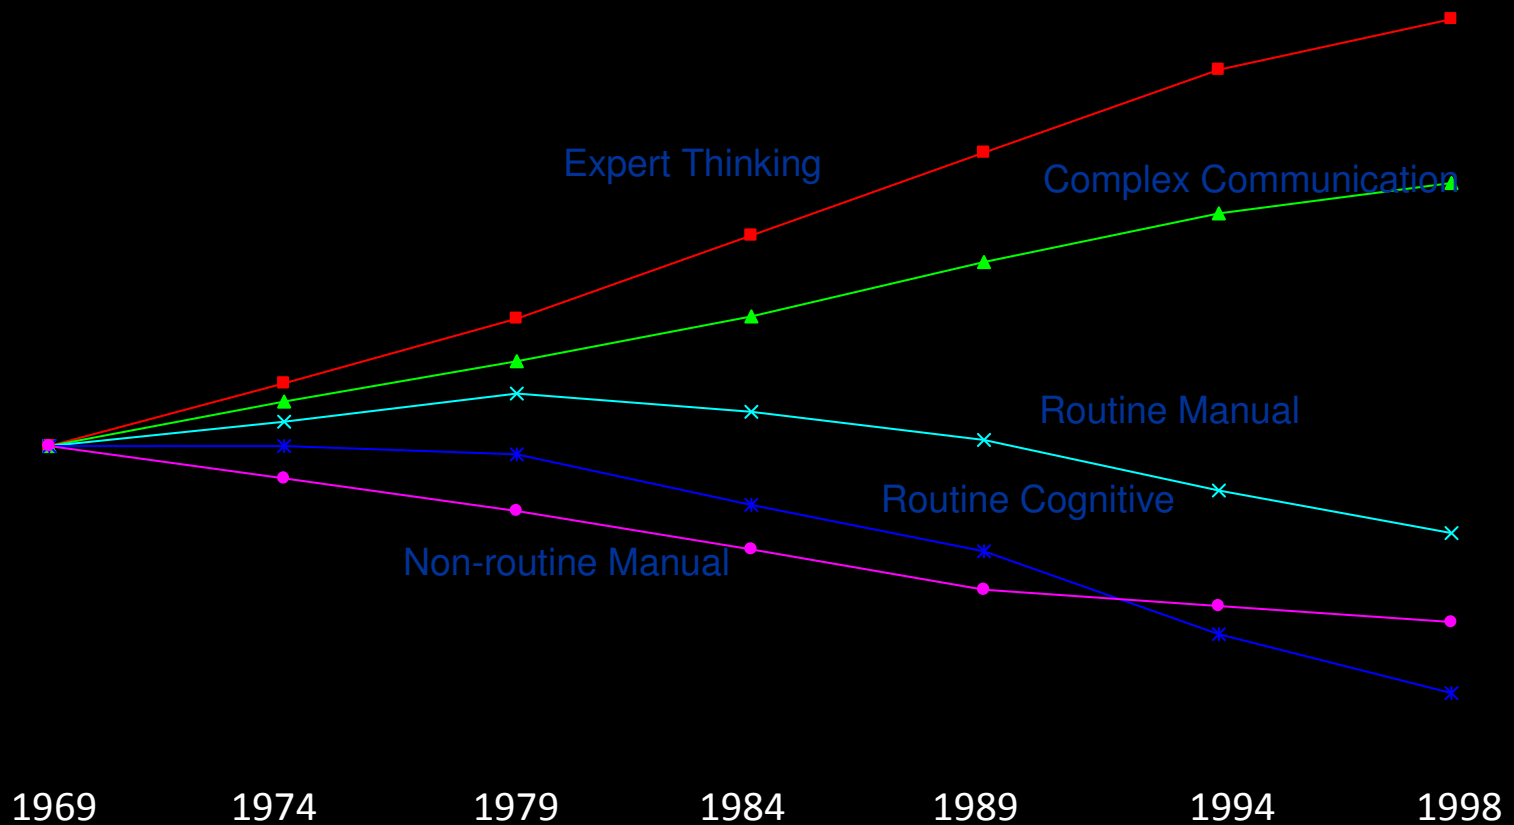

Asia has passed Europe in world economy

Entrepreneurship is a key success factor

Ecological condition of our planet has gone worse

Competition gets tougher, pace of change is faster

Demands for job-skills is changing

Paradox of educational change

It ain't what you don't know that gets
you into trouble.

It is what you know for sure that just ain't
so.

- *Mark Twain*
